Ed Holmes  
Instructor of Information Technology Program  
Quincy Comprehensive High School  
100 Coddington Street  
Quincy, MA 02169  
Room C204

Dear Mr. Holmes:

Over the past three years I have had the pleasure of being in the Information Technology program taught by you. While it may seem as though I didn't learn anything, I did learn a whole lot and it was a pleasure to have you as my teacher as well as my advisor in SkillsUSA.

The cornerstone of what has made high school great for me is getting to be in your classroom and being in SkillsUSA. The amount of fun I had is off the charts and the people that I've met through it have forged friendships that will last for years to come.

I want to thank you most importantly for always putting up with me because I know myself that I can be tough to deal with at times. I hope that in the years to come you'll welcome me back as a visitor. But most importantly I know is that the skills and knowledge that I am taking with me after the completion of I.T. have prepared me for a future both in college and in a career.

Thank you Mr. Holmes for your time over the last three years, the patience you have had with us, and thank you for being my favorite class in high school.

Sincerely and many thanks,

Michael Fernald
